Overview

Welcome to GymBuddy. The all-in-one gym management application that creates a network of gyms that the user can view the current occupancy, available machines, and workouts available at the gym.

User Features

User Login/Create Account

GymBuddy uses accounts to manage the user's activity, custom workouts and playlists. A user is able to Login and create an account.

To Create Account:

- From home, press the account icon on the bottom right of the screen.
- On the Login screen, press the Sign Up button on the left.
- Fill in all fields on the Create Account screen.
- Press the Create button.

To Login:

- From home, press the account icon on the bottom right of the screen.
- On the Login screen, fill in your email address and password.
- Press the Login button.

QR Code Sign Ins

Once a user is signed into the GymBuddy application, they have the option to use the QR Code uniquely generated for them. This QR code allows the user to sign in and out of gyms within the network, while also being able to use the QR code for checking into machines.

To Use:

- Press QR Code Icon in bottom center of screen to change to the Scan screen.
 - Login into your account, or create an account, if not you are not already logged in.
- Press the Generate QR Code button in the center of the screen.
- Scan the generated QR Code at any location within the GymBuddy Network.

View Gyms

Once a user is logged in, they should see a page with all the gyms currently in the network within a certain radius of the user. Here is the way a user will proceed to seeing the occupancy of a gym. They may view the gyms proceed forward from here to view machines.

Viewing Machines and Machine Queues

A user may view machines available at a gym in order to determine if that gym has what they are looking for and if the machines are up and running to use. Users are also able to join queues for machines they wish to use, but are in active use.

To View:

- From the Gym Screen, press the Gym box to view its machines.
- Once on the machine screen, all machines should be loaded.
- Select any machine to view it and see its details or join a queue for the machine

To Join Queue:

- Once a machine has been selected, press the join queue button

To leave Queue:

- If in a queue, select the machine that you are leaving the queue of and press the leave queue button.

Workouts: Viewing, Creating, and Selecting

A user is able to use workouts that can automatically put a user into a queue for a machine. They also can create new workouts and assign them to machines.

To View:

- On the top right of the screen, press the workout icon.
- Once workouts have loaded, press the desired workout box.

To Select Workout:

- Once a workout has been selected, press the begin workout button.

To Create Workout

- On the workout page, press the Create Workout or Playlist button.
- Fill in the form to create a workout.
- Press the Create button.

Playlist: Viewing, Creating, and Selecting

A user is able to use playlists instead of just a single workout to progress through an entire session at the gym, automatically setting the user in the next machine queue when they are completing a workout.

To View:

- On the workout screen, the playlists load under the workouts in their own section.
- View playlist by pressing the playlist box.

To Create:

- On the workout screen, press the Create Workout or Playlist button.
- Now on the Create Workout or Playlist page, select the Create Playlist tab in the top right of the page.
- Fill in the form and select the workouts intended for the playlist.
- Press the Create button.

To Select:

- On the workout screen, press the playlist box desired to complete.
- Press the start playlist button at the bottom of the playlist screen.
